TITLES AND KEYWORDS

A
absorption 961
activity coefficients 942
adaptation 471
adhesional force 753
adsorption 803, 921, 931
agglomerates 3
agglomeration 753
agitation 223
air separation 921, 931
Algorithmic method for control structure selection based on the RGA and RIA interaction measures, An, Kookos, I.K. and Lygeros, A.I. 458
Analysis of equilibrium data of CO_2 in aqueous solutions of diethanolamine (DEA), methyldiethanolamine (MDEA) and their mixtures using the modified Kent Eisenberg model, Haji-Sulaiman, M.Z., Aroua, M.K. and Benamor, A. 961
annulus 723
aromatics 562
aspect ratio 823
Assessment of sliding mesh CFD predictions and LDA measurements of the flow in a tank stirred by a Rushton impeller, Ng, K., Fentiman, N.J., Lee, K.C. and Yianneskis, M. 737
automatic synthesis procedures 239
Axial dispersion of liquid in gas-liquid cocurrent downflow and upflow fixed-bed reactors with porous particles, Iliuta, I., Thyrion, F.C. and Muntean, O. 64

B
baffle spacing 635
baffle thickness 635
batch plant 973
batch process 685, 700
batch process control 711
Bayer process 97
biaxial drawing 38
biaxial orientation 38
binary interaction parameter 594
bins 775
blended amine 961
Boiling hot issues—some resolved and some not-yet-resolved, Wadekar, V.V. 133
bond deformation 767
break-up 55
bubble column 823
bubble size and coalescence 562
bubble splitting 585
bulk solids 775
burnoff distribution 864

C
Calculation of burnoff distributions of char particles in a bubbling fluidized bed reactor by means of batch combustion experiments, Marbán, G., Fuertes, A.B. and Pis, J.J. 864
Calculation of wave-plate demister efficiencies using numerical simulation of the flow field and droplet motion, The, Wang, Yi and James, P.W. 980
capital-energy tradeoff 259
carbon dioxide 961
cascade analysis 685
ceramic membranes 911
cereals 797
CFD 153, 737, 951
CFD contribution to a design procedure for discs and doughnuts extraction columns, Aoun Nabli, M.S., Guiraud, P. and Gourdon, C. 951
char 864
Characterization and prediction of nanofiltration membrane performance—a general assessment, Bowen, W.R. and Mohammad, A.W. 885
churn to annular transition 612
circulating fluidized beds 748
closed-loop identification 451
coalescence 55
cohesive 753
combined heat and power systems 239
combustion 864
Comparison of various heat pump assisted distillation configurations, Fonyo, Z. and Benkö, N. 348
complex fluids 539
complex systems 162
compositional simulation 594
computer aided design 45
conceptual design 361
Condensation heat transfer fundamentals, Rose, J.W. 143
constitutive model 38
Continual self-tuning from load disturbance responses, Qing-Guo Wang, Chang-Chieh Hang and Qiang Bi 471
continuous processes 16
continuous synthesis 669
control 308, 319
Control of integrating process using dynamic matrix control, Gupta, Y.P. 465
control structure design 849
control structure selection 458
controllability 185
Controlled production of emulsions using a crossflow membrane. Part I: Droplet formation from a single pore, Peng, S.J. and Williams, R.A. 894
Controlled production of emulsions using a crossflow membrane. Part II: Industrial scale manufacture, Williams, R.A., Peng, S.J., Wheeler, D.A., Morley, N.C., Taylor, D., Whalley, M. and Houldsworth, D.W. 894
crossflow membrane 894
crystallization 803
cyclohexane 368

D
dairy whey 417
data recovery 478
DEA 961
deaeration 585
decentralized control stucture 185
decentralized controllers 458
Decomposition of requirements specifications for batch process control, Love, J. and Bunch, M. 973
Decomposition-based approach for process optimization and simultaneous heat integration: Application to an industrial process, A, Papalexandri, K.P. and Pistikopoulos, E.N. 273
defluidization 753
design 153, 368, 657, 700
Designing for the interactions between water-use and effluent treatment, Kuo, W.-C.J. and Smith, R. 287
Determination of 3-D flow fields in agitated vessels by laser-Doppler velocimetry: use and interpretation of RMS velocities, Mavros, P., Xuereb, C. and Bertrand, J. 223
Determination of the residence time distribution of solid particles by a photometric method, Allal, K.M., Dolignier, J.C. and Martin, G. 643
Development of an integrated approach to modelling of polymer film orientation processes, Gerlach, C., Buckley, C.P. and Jones, D.P. 38
Developments in industrial computational fluid dynamics, Gosman, A.D. 153
diesel engines 124
dimensionality reduction 478
discrimination 657
discs and doughnuts columns 951
Dispersion/coalescence model in a turbulent bed contactor, A,

Guerriere, R.A., Fayed, M.E. and Matchett, A.J. 873
distance 657
distillation 843
distillation design 335
distillation sequence 302
distributed effluent treatment 287
dividing wall distillation 308, 319
double controller 445
Double-controller scheme for separating load rejection from set-point tracking, Yu-Chu Tian and Furong Gao 445
downflow 64
droplet motion 980
dropwise 143
drowning-out 809
drying kinetics 815
dynamic matrix control 465
dynamic programming 45
dynamic simulation 185, 308, 319

E
economic analysis 361, 417
economic evaluation 348
Economic tradeoffs for extraction systems, Minotti, M., Doherty, M.F. and Malone, M.F. 361
Edmister's rule for acentric factor 969
Effect of sparger design and height to diameter ratio on fractional gas hold-up in bubble columns, Thorat, B.N., Shevade, A.V., Bhilegaonkar, K.N., Aglawe, R.H., Parasu Veera, U., Thakre, S.S., Pandit, A.B., Sawant, S.B. and Joshi, J.B. 823
efficiency 980
emulsification 894
emulsifier 55
emulsion 55
Energy efficiency in high purity cyclohexane production, Ruiz, C.A., Jaksland, C. and Gani, R. 368
energy optimization 259
energy recovery 348
energy savings 368
energy utilization 894
enthalpy of vaporization 969
Entropy generation in multifield flows: equations and examples of applications, Kockum, H. and Jernqvist, Å. 210
environmental impact 368
escape 55
Escherichia coli 417
Evaluation of the thin-layer method used for measuring single particle drying kinetics, Fyhr, C. and Kemp, I.C. 815
exergy analysis 389
Exergy flows analysis in chemical reactors, Sorin, M., Lambert, J. and Paris, J. 389
experimental results 193
Experimental study of reactive mixing in a laminar flow batch reactor, Hayes, R. E., Afacan, A., Boulanger, B. and Tanguy, P.A. 73
external flow 162
extraction 361, 942
extraction column design 951
extractive distillation 368
extrusion 3

F
fault detection 478, 490
fault identification 490
fault tolerant control systems 490
feeding 775
fermentation 417
fibre optic probe 748
films 38
filmwise 143
fine particles 767
finite element analysis 38
fixed bed 64, 815
flow 775
flow boiling 133
flow patterns 133, 571
flow in porous media 162
flow regime maps 612
flow regime transitions 612
flow simulation 539
fluid catalytic cracking (FCC) 499
fluid dynamics 843
fluid mechanics 22
fluidization 753, 873
fluidized bed 864
fluidizing packings 855
Food particles and the problems of hydration, Lillford, P.J. and Fryer, P.J. 797
free baffle area 635
frequency responses 471

G
gas hold-up 823
gas migration 553
gas-continuous 873
Generation and use of partial solutions in process synthesis, The, Fraga, E.S. 45
glass transition 797
graph traversal 45
gravure coating 22

H
heat exchanger fouling 97
heat exchanger networks 259, 700
heat integration 273
Heat integration for batch processes. Part 1: Process scheduling based on cascade analysis, Zhao, X.G., O'Neill, B.K., Roach, J.R. and Wood, R.M. 685
Heat integration for batch processes. Part 2: Heat exchanger network design, Zhao, X.G., O'Neill, B.K., Roach, J.R. and Wood, R.M. 700
heat pumping 348
heat recovery 685
heat transfer 162
heat transfer enhancement 108
Heat transfer processes in diesel engines, Arcoumanis, C., Cutter, P. and Whitelaw, D.S. 124
heat transformers 348
heptane isomers 368
Herschel-Bulkley 16
high purity 368
hold-up prediction 620
holdup 571
hydration 797
hydrodynamics 643
hydrofoil 835

I
identification 471
Impact of pressure-dependent interfacial tension and buoyancy forces upon pressure depletion in virgin hydrocarbon reservoirs, The, McDougall, S.R. and Mackay, E.J. 553
improved EOS 594
impurities 803
inclusion 55
industrial 153
industrial control 490
Industrial production of polyhydroxy alkanoates using *Escherichia coli*: An economic analysis, van Wegen, R.J., Ling, Y. and Middelberg, A.P.J. 417
initial oil saturation 604
input multiplicity 525
Input-training neural network approach for gross error detection and sensor replacement, An, Reddy, V.N. and Mavrovouniotis, M.L. 478
Integrated design of a conventional crude oil distillation tower using pinch analysis, Liebmann, K., Dhole, V.R. and Jobson, M. 335
interface resistance 143
interfacial breakdown model 803
Interfacial model for the transfer of impurities into the sucrose crystal, An, Lionnet, G.R.E. 803
interfacial transport 210
internal flow 162
interparticle forces 753
Interpretation of paste extrusion data, Amarasinghe, A.D.U.S. and Wilson, D.I. 3
inversion 55

J
jet 728

K
kiss coating 29
Kraft process 97

L
laser Doppler velocimetry 223
lattice-gas automata 162
Lattice-gas automata methods for engineering, Biggs, M.J. and Humby, S.J. 162
LDA 737, 835
Learning to control the performance of batch processes, Martinez, E.C., Pulley, R.A. and Wilson, J.A. 711
least squares method 471
level control 465
Lightnin 223
liquids 969
load rejection 445
Local solid concentration measurement by fibre optics: Application to circulating fluidized beds, Saberi, B., Shakourzadeh, K. and Guigon, P. 748
loop-seal 761
low coordination states 767
'Low-order' optimization of soft solids processing, Briscoe, B.J., Corfield, G.M., Lawrence, C.J. and Adams, M.J. 16
lubrication theory 22, 29

M
magnetic resonance imaging (MRI) 797
marine environment 562
mass integration 376
mass transfer 562, 873
material design 408
material processing 38
Mathematical model of roll-to-web kiss coating, A, Gaskell, P.H., Rees, S.R., Savage, M.D. and Storey, S.P. 29
mathematical modelling 22, 911
mathematical programming 685, 700
Matrix-based heuristic synthesis of distillation sequences with several feed streams and multicomponent products, Zhi-Yong Liu 302
Maxwell equations 193
MDEA 961
measurement selection 849
measuring technique 748
mechanisms 133
mechanochemistry 767
membrane characterization 885
membrane reactor 911
membrane technology 894
Methyl-tert-butyl-ether catalytic distillation column. Part 1: Multiple steady states, Eldarsi, H.S. and Douglas, P.L. 509
Methyl-tert-butyl-ether catalytic distillation column. Part 2: Optimization, Eldarsi, H.S. and Douglas, P.L. 517
microwave drying kinetics 193
Minimization of the annual cost for complete utility systems, Wilkendorf, F., Espuña, A. and Puigjaner, L. 239
Mitigation of process heat exchanger fouling: an integral approach, Müller-Steinhagen, H. 97
mixed integer linear programming 677
mixed-integer optimization 246
Mixel 223
mixing 9, 73, 223, 728
mixing time 635
mixture effects 133
mixtures 969
Model for liquid phase flow on sieve trays, Mehta, B., Chuang, K.T. and Nandakumar, K. 843
Model for particle collection in a turbulent bed contactor—new packings, A, Gimenes, M.L. and Handley, D. 855
model predictive control 465
modelling 9, 29, 873
Modelling of continuous synthesis process of TiO_2 particles using slug flow tubular reactor, Kubo, M., Kawakatsu, T. and Yonemoto, T. 669
Modelling of heat transfer in radiating and combusting systems, Carvalho, M.G. and Farias, T.L. 175
Modelling of polyurethane composites mixing cycles, Dubois, C., Tanguy, P.A. and Aït-Kadi, A. 9
models 973
molecular design 376
molecular graphics 942
monoliths 921, 931
More chemistry for finer particle technology, Senna, M. 767
morphology 809
Morphology of NaCl crystals in drowning-out precipitation operation, Takiyama, H., Otsuhata, T. and Matsuoka, M. 809
MTBE catalytic distillation 509, 517
multicomponent separation 302
multiphase 571
multiphase flow 162, 539
multiple steady states 509
multiple stream matching 685
Multiple utilities targeting for heat exchanger networks, Shenoy, U.V., Sinha, A. and Bandyopadhyay, S. 259
Multiplicity and pseudo-multiplicity in MTBE and ETBE reactive distillation, Sneesby, M.G., Tadé, M.O. and Smith, T.N. 525

N
nanofiltration 885
Nernst-Planck 885
network model 553
neural networks 478
NGL 368
non-coalescing liquid 823
non-Newtonian liquids 823
nonlinear PCA 478
Novel profiled blade impeller for homogenization of miscible liquids in stirred vessels, A, Fentiman, N.J., St. Hill, N., Lee, K.C., Paul, G.R. and Yianneskis, M. 835
nucleation 809
Numerical investigation of combined microwave and convective drying of a hygroscopic porous material: a study based on pine wood, A, Turner, I.W., Puiggali, J.R. and Jomaa, W. 193
Numerical modelling of liquid withdrawal from gravure cavities in coating operations, Schwartz, L.W., Moussalli, P., Campbell, P. and Eley, R.R. 22
numerical simulation 980

O
offshore oil and gas 562
oil/water/air flow 571
oilfield 539
On estimating the credibility of a model for a system, Singh, Santokh 657
On the mechanism of the inversion of emulsions, Groeneweg, F., Agterof, W.G.M., Jaeger, P., Janssen, J.J.M., Wieringa, J.A. and Klahn, J.K. 55
On-line process identification from closed-loop tests under PI control, Suganda, P., Krishnaswamy, P.R. and Rangaiah, G.P. 451
on-line size measurement 894
Operation and control of dividing wall distillation columns. Part 1: Degrees of freedom and dynamic simulation, Abdul Mutalib, M.I. and Smith, R. 308
Operation and control of dividing wall distillation columns. Part 2: Simulation and pilot plant studies using temperature control, Abdul Mutalib, M.I., Zeglam, A.O. and Smith, R. 319
optimization 16, 45, 368, 376, 517, 677
Optimization techniques for process synthesis and material design under uncertainty, Dua, V. and Pistikopoulos, E.N. 408
oscillatory baffled column 635
Output effectiveness and scaling sensitivity for secondary measurement selection, Cao, Y., Owens, D.H. and Rossiter, D. 849
output multiplicity 525

P
parameter estimation 451
parametric programming 408
particle collection modelling 855
particle size control 894
particle size distribution 669
Particle technology—reflections and horizons: An engineering perspective, Roberts, A.W. 775
paste 3
pastes 16

Phenomena based design approach to reactive distillation, A. Hauan, S. and Lien, K.M. 396
photometry 643
pilot plant 308, 319
pinch analysis 259, 335
plant modelling 97
Plant-wide control of an industrial process, Lausch, H.-R., Wozny, G., Wutkewicz, M. and Wendeler, H. 185
plantwide control 185
poly(ethylene terephthalate) 38
polyhydroxyalkanoate 417
polymerization 9
polyurethane 9
population balance equations 669
porous media 539
porous media drying model 193
precipitation 809
prediction 628
predictive control 499
preheat train 335
pressure depletion 553
pressure drop 571, 628
pressure fluctuations 620
pressure swing adsorption 921, 931
pressurized circulating fluidized bed 761
process control 445, 849, 973
process integration 246, 273
process intensification 562
Process intensification: Higee seawater deaeration, Peel, J., Howarth, C.R. and Ramshaw, C. 585
process monitoring 478
process optimization 239
process optimization and control 539
process performance 711
process synthesis 45, 302, 376, 396, 408
processes 427
produced water 562
profiled blade impeller 835
protein 797
pseudo-multiplicity 525
pulsed flow 951
pyrolysis 427

Q
quality control 711

R
radiation heat transfer 175
radiation modelling 175
radiative and convective heat transfer 124
radiative properties of combustion products 175
rank order analysis 361
rapid flash calculation 594
Rapid and robust phase equilibrium calculation to model fluids in reservoir and surface processing, Gozalpour, F., Danesh, A., Todd, A.C. and Tehrani, D.H. 594
re-use 287
reaction 73
reactive distillation 396, 525
reactor 643, 728
reactor design 389
recycle 185
recycle device 761
recycling 287
regenerations 287
rematching 700
Removal of dissolved aromatics from water: Comparison of a high intensity contactor with a packed column, Waldie, B. and Harris, W.K. 562
reservoir management 539
residence time distribution 643
RGA 185
RGA matrix 458
RIA matrix 458
Rigorous MINLP model for the optimal synthesis and operation of utility plants, A, Bruno, J.C., Fernandez, F., Castells, F. and Grossmann, I.E. 246
Rising velocity of Taylor bubbles in an annulus, The, Hills, J.H. and Chéty, P. 723
Road ahead to real-time oil and gas reservoir management, The, Smith, R.G. and Maitland, G.C. 539
Role of liquid bridge forces in cohesive fluidization, Wright, P.C. and Raper, J.A. 753
rotating packed beds 585
Rushton impeller 737
Rushton turbine 223

S
S88 973
scheduling 685
scheduling problems 677
second order modelling 451
selectivity 728
semi-annular flow 620
Sensor fault detection and identification in a pilot plant under process control, Afonso, P.A.F.N.A., Ferreira, J.M.L. and Castro, J.A.A.M. 490
sensors 539
sequential 657
sequential modular 45
set-point tracking 445
sieve tray 843
silos 775
Simple equation for enthalpy of vaporization of liquids, A, Sivaji, K. and Prasad, D.H.L. 969
simulation 368
Simulation tools for the design of industrial-scale membrane reactors, Koukou, M.K., Papayannakos, N., Markatos, N.C., Bracht, M. and Alderliesten, P.T. 911
Simultaneous synthesis of mass separating agents and interception networks, Hamad, A.A. and El-Halwagi, M.M. 376
single particle 815
slug flow 669
slug to churn transition 612
smart materials 539
sodium chloride 809
soft sensor 499
Soft sensor based predictive control of industrial fluid catalytic cracking processes, Yang, S.H., Wang, X.Z., McGreavy, C. and Chen, Q.H. 499
solid concentration 748
solid state chemistry 767
Solids circulation rate prediction in a pressurized loop-seal, Cheng, L., Basu, P. and Cen, K. 761
solvent 942
Solvent design for liquid extraction using calculated molecular interaction parameters, Meniai, A-H., Newsham, D.M.T. and Khalfaoui, B. 942
solvent recovery 361
solvent synthesis 376
Some efficient formulations for the simultaneous solution of trim-loss and scheduling problems in the paper-converting industry, Westerlund, T. and Isaksson, J. 677
sparger design 823
starch 797
statistics 3
steady state simulation 509, 517
steam front 604
steam injection rate 604
steam methane reforming 389
steam-oil ratio 604
Steamflooding of medium and light oils in limestone using 3-D laboratory model, Bağci, S., Turna, E.P. and Altmiş, U. 604
stirred vessel 737, 835
stochastic modelling 223
stockpiles 775
storage 775
structures 973
sucrose 803
sugar 797
surface fracture 3
swelling 797
switching probability 223
synthesis 368

Systematic study of the effect of geometrical parameters on mixing time in oscillatory baffled columns, A, Ni, X., Brogan, G., Struthers, A., Bennett, D.C. and Wilson, S.F. 635

T
Taylor bubble 723
Techno-economic evaluation of high temperature pyrolysis processes for mixed plastic waste, Westerhout, R.W.J., van Koningsbruggen, M.P., van der Ham, A.G.J., Kuipers, J.A.M. and van Swaaij, W.P.M. 427
thermal coupling 308, 319
thermo-dynamic design 210
thin films 29
thin layer method 815
three-D laboratory model 604
three-phase 873
Three-phase oil/water/air vertical flow, Woods, G.S., Spedding, P.L., Watterson, J.K. and Raghunathan, R.S. 571
three-phase reactors 64
time-dependent numerical simulation 22
TiO_2 particle 669
transport mechanism 885
trim-loss problems 677
turbulence 162, 223, 737, 835
turbulent bed contactor 855
turbulent flow 980
Turbulent jet reactors: Mixing time scales, Forney, L.J. and Nafia, N. 728
two-phase flow 210, 612, 620, 628

U
unknown load disturbance 471
unstructured mesh 153
up lift pressure 628
upflow 64
utility load distribution targets 259
utility systems 246
utility systems design 239

V
velocity measurement 723
vertical 628
vertical co-current flow 571
vertical flow 612, 620
vertical hold-up 620
Vertical two-phase flow: Part I-Flow regimes, Spedding, P.J., Woods, G.S., Raghunathan, R.S. and Watterson, J.K. 612
Vertical two-phase flow: Part II-Experimental semi-annular flow and hold-up, Spedding, P.L., Woods, G.S., Raghunathan, R.S. and Watterson, J.K. 620
Vertical two-phase flow: Part III-Pressure drop, Spedding, P.L., Woods, G.S., Raghunathan, R.S. and Watterson, J.K. 628
void fraction 210
volume fraction 55
vortex generators 108
Vortices, generators and heat transfer, Fiebig, M. 108

W
water system 287
wave-plate demister 980

Z
Zeolite monoliths for air separation. Part 1: Manufacture and characterization, Li, Y.Y., Perera, S.P. and Crittenden, B.D. 921
Zeolite monoliths for air separation. Part 2: Oxygen enrichment, pressure drop and pressurization, Li, Y.Y., Perera, S.P. and Crittenden, B.D. 931

BOOKS REVIEWED

Characterisation of porous solids IV. B. McEnaney, T.J. Mays, J. Rouquérol, F. Roderiquez-Reinoso, K.S.W. Sing and K.K. Unger (editors) (The Royal Society of Chemistry) Reviewed by Michael Streat 882
Chemical calculations. P. Yates (Blackie Academic & Professional) Reviewed by Paul Sharratt 532
Clathrate hydrates of natural gases. E. Dendy Sloan Jr. (Marcel Dekker) Reviewed by Adrian Todd 649
Computational transport phenomena—numerical methods for the solution of transport problems. W.E. Schiesser and C.A. Silebi (Cambridge University Press) Reviewed by G.L. Quarini 882
Corrosion engineering handbook. P.A. Schweitzer (editor) (Marcel Dekker) Reviewed by T. Richardson 82
Fibrous materials. K.K. Chawla (Cambridge University Press) Reviewed by Ken Jones 988
Fundamentals of interfacial engineering. R.J. Stokes and D.F. Evans (Wiley-VCH) Reviewed by Kieran Looney 440
Handbook of fiber science and technology: Volume III, High technology fibers Part D. M. Lewin and J. Preston (editors) (Marcel Dekker) Reviewed by K.M. Jones 82
Introduction to plastics and composites: Mechanical properties and engineering applications. E. Miller (Marcel Dekker) Reviewed by D. Mackeson 83
Pipe line rules of thumb. E.W. McAllister (editor) (Gulf Publishing) Reviewed by Tom Baxter 651
PVT and phase behaviour of petroleum reservoir fluids. A. Danesh (Elsevier Science) Reviewed by Alan Stephen 650
Thermal data for natural and synthetic fuels. S. Guar and T.B. Reed (Marcel Dekker) Reviewed by R. Kandiyoti 988

REGULAR FEATURES

Contents of the Canadian Journal of Chemical Engineering 93, 442, 534, 653, 764, 990
Doctorates in Chemical Engineering 1996–1997 85
List of Referees, 1997—Addendum 94
1998 991

CONFERENCE REPORT

International Conference on Mixing and Crystallization, 22–25 April 1998, Tioman Island, Malaysia Reported by Shaliza Ibrahim and B. Sen Gupta 986

CORRESPONDENCE

From Dr T.J. Evans 235
From Professor G.F. Hewitt 535
